MEMORANDUM TO:

FROM :

SUBJECT

: Cartographic Support -

25X1X4

1. In your letter of 13 August you pose several questions which I shall attempt to answer.

A. D/OC agrees that an index of mosaics is probably useful and we could entertain a request to prepare such. We would probably add as a separate item on the "mosaic" map.

B. We see no reason why we can't supply additional copies of the several maps as you requested. It will require regular press run rather than proofing press.

C. We will initiate the above on Bulgaria, as you requested.

D. You mention that "It seems a pity that the work [redacted] has done goes no further than this office". "Would you be willing to have D/OC prepare the indexes for quantity printing?" Please explain - this does not make sense to us here in D/OC.

E. If [redacted] has prepared any indexes for [redacted] please send along an example.

2. Our efforts on a new city plans program are progressing very well. We hope to eventually assign 5 to 6 persons to the effort. Our current work centers on Alma Ata, Stalinabad, and Riga. [redacted] may be contacting you for specific info on these (and others later) early in the compilation. We also plan to send you a copy (printed preliminary) when available so that [redacted] can add info from their files as previously agreed. We shall be indebted to such help and will be happy to supply printed copies [redacted] upon completion.

3. I am also releasing copies of those cities completed to date. D/GL will send them under separate cover directly to [redacted] you may wish to mention their release.

4. I am pleased with your apparent "digging-in" and wish to encourage you in maintaining a flow of communications.
